- Built Client Management System using Java to establish the back-end architecture of recharging solutions.
- Developed prototype with Point-of-Sales development team.
- Improved company's website through design via HTML and CSS execution.

Academic Experience

HealthAssist+ | Android Personal Health Record Application | Charotar University

- Designed and implemented an android application to store health care data in digital format in the local database using MySQL.
- Created application interface using Google's Material Design libraries.

Trailer Hub | Android Movie Application | Charotar University

- Developed and designed an android application using Android Studio.
- Integrated themoviedb API which contains the database of all the movies.

Py-Chathon | Python Chat Application | Charotar University

- Executed socket programing in Python to develop a client server application to efficiently exchange information among users.
- Built the application User Interface using Python library Tkinter.

Equation Library | Java Database Application | Charotar University

- Implemented Object Oriented Programing(OOPs) concepts to develop a web application using Java which contains a database of many equations. User can have the CRUD operations on the application to store the valuable equations.
- Programed the application back-end and integrated with local database using MySQL.
- Worked with Java Applets to design the application User Interface.

Games Using C++ | Console Application | Charotar University

- Incorporated the fundamental algorithms to establish a console game application.
- Established the functioning of console applications, structuring algorithms and designing the application.

Skills

- **Technical:** Java, Python, HTML, CSS, JavaScript, C/C++, Web Services, MySQL, Android, Cloud Computing, GIT, AngularJS, ReactJS
- **Personal:** Problem Solving, Organizational, Analytical, Team Player, Detail-Oriented, Time Management
